MORAL SUPPORT OF AMERICA

Governor General Tim Healy of the Irish Free State asks that the American public give the new Irish government its moral support. In an interview the governor general expressed the hope that America at least would withhold financial aid from the enemies of the Free State, saying that the funds are used only for destruction of property and ambushing of

They are the absolute masters of their island and the makers of their own fortunes as well as the shapers of the destiny of their own country.

For more than four centuries Irishmen went to the gallows or died fighting for the freedom of their native land. Now that they have won it they should make the most of it. Hon. Tim' Healy began fighting for home rule for Ireland more than a third of a century ago. He was a member of the British parliament, a follower of Gladstone when Parnell was the matchess leader of the Irish Nationalists.

He is one of the famous lawyers, thinkers writer and orators of Ireland. He is for neace with England, peace with the world and the forward murch of Ireland until it occupies a proud place in the nations of the earth. Now why should Americans lend financial aid to medmen bent only upon the destruction of property and the murder of those who are building a government both stable and free in the emerald isle.

SPEAKING OF LAWYERS

Judge George Calboun declared unconstitu tional the state law imposing a tax of 2 per cent on the gross receipts of pipe lines operating in Texas. Now the case will go to the court of civil appeas, accompanied by a motion to advance and certify to the supreme court in order that an unmediate determination of the issues may be had in advance of the regular session of the legislature commencing January pinth.
